

A2 FIORI+ USER MANUAL

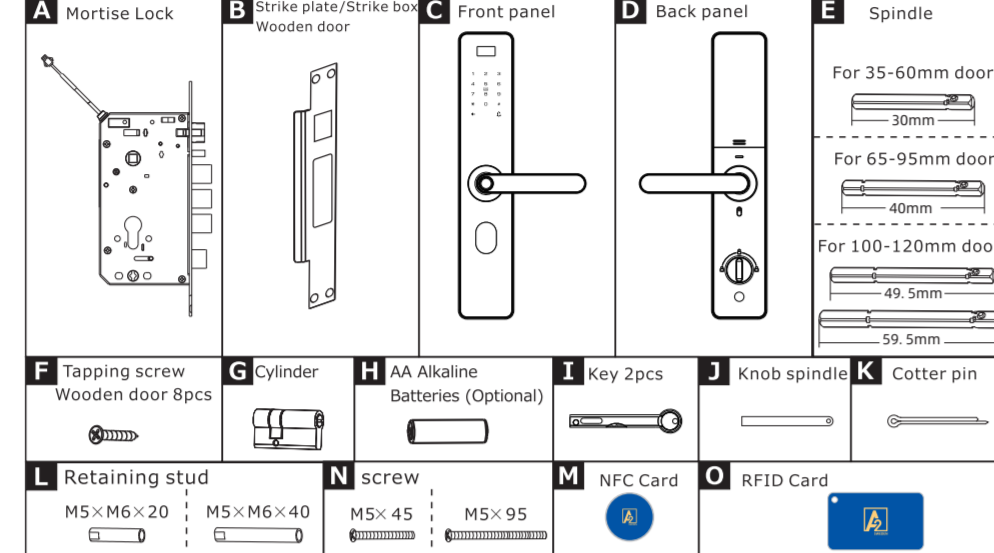

- Fingerprint
- Password
- Card
- Mobile APP
- Mechanical Key

Please register the admin users in time.
Ensure not to use consecutive repetitive numbers for your safety.

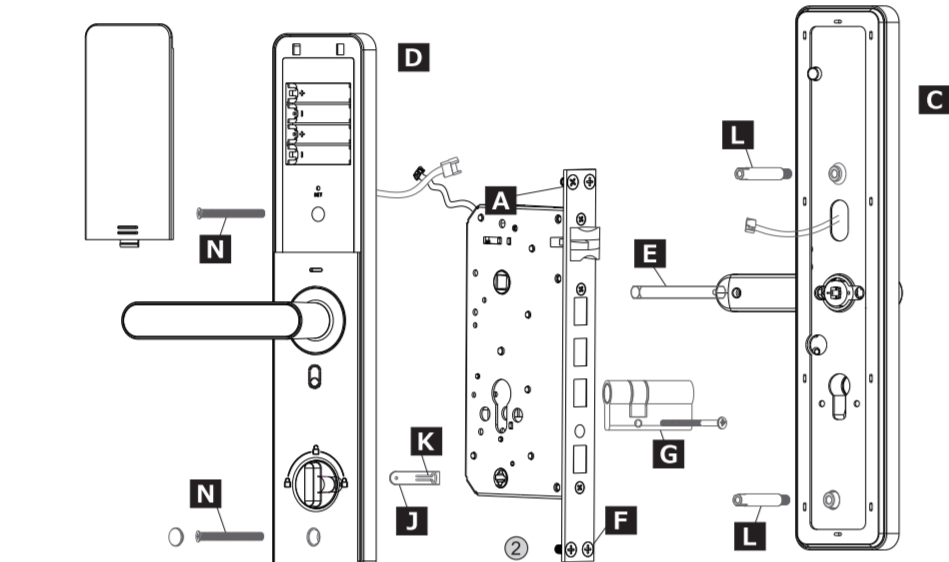

Safety Cautions

- The manual should be read thoroughly before operating the product.
- For security, the password should be changed regularly.
- When the batteries are flat, all batteries should be replaced together with new ones rather than used ones.
- Do not install, disassemble or repair without the assistance of a product technician.

Graphic Description

Restore Factory Setting

1. Remove the battery cover from the back panel.
2. Keep pressing the "initialization key" more than 5s. When you hear the prompt "Initialization, press # to confirm or press * to exit".
3. Press # to confirm, the number would flash and give notification "restore factory mode succeed".

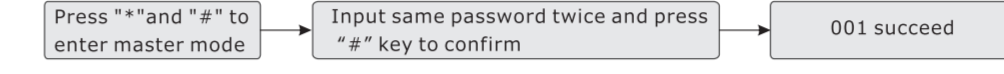

Demo Mode

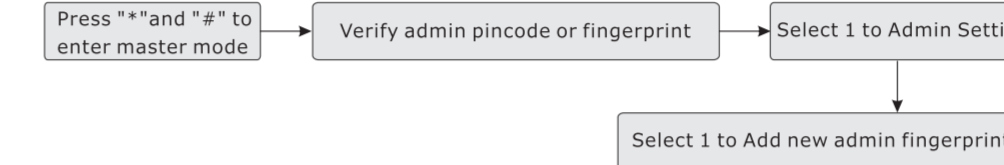

Under demo mode, any fingerprint/pincode/card can unlock, please register the admin users timely.

Administrator Management

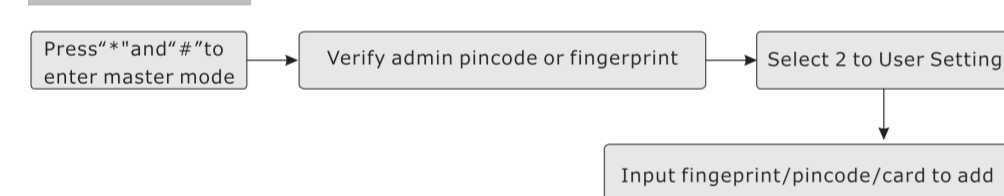

a. Add First Admin Pincode

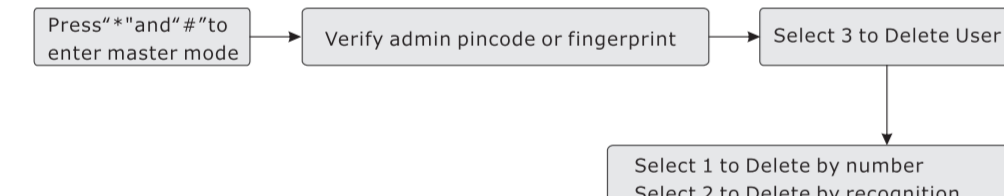

b. Add or Revise Admin

Add Normal User

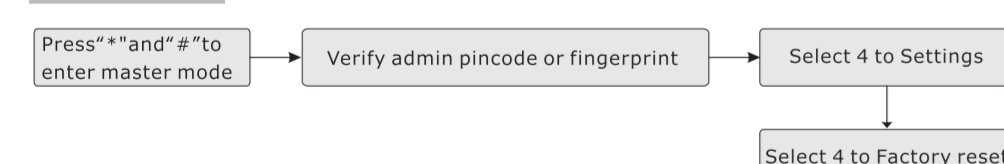

Delete User

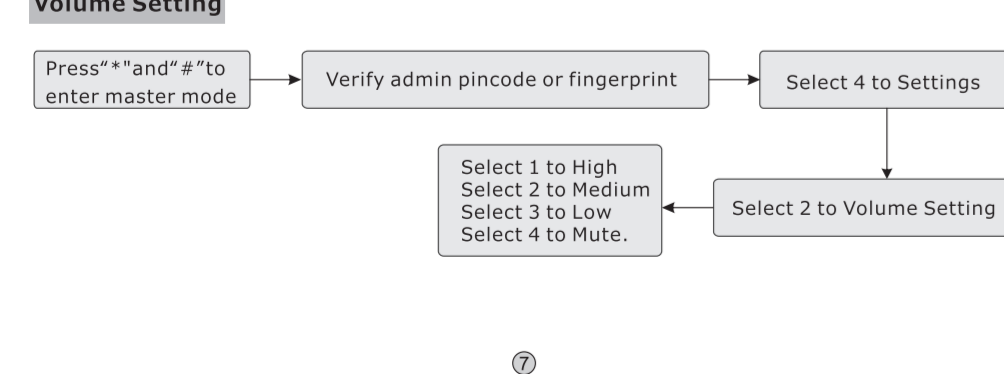

Note:
a. To delete single pincode / fingerprint / card, you can input the user ID number or verify the one you prefer to delete on the lock.
b. The admin users can not be delete via the delete user menu.

Factory reset

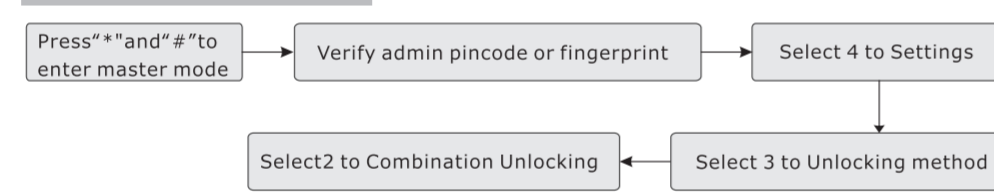

Note:
a. Under Factory reset, the lock would be always open.

Volume Setting

Dual Verification Function

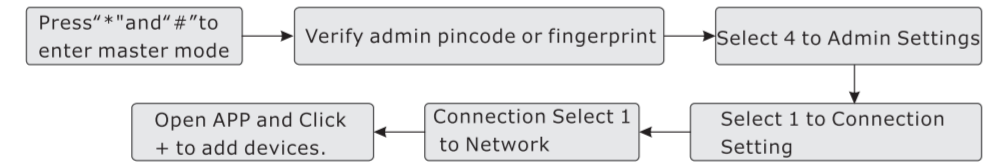

Note:
1. The default standard is with single verification. Under dual-verification mode, you need to verify 2 users to unlock the door, such as "Fingerprint+ Pincode" or "fingerprint + card" or "pincode + card".

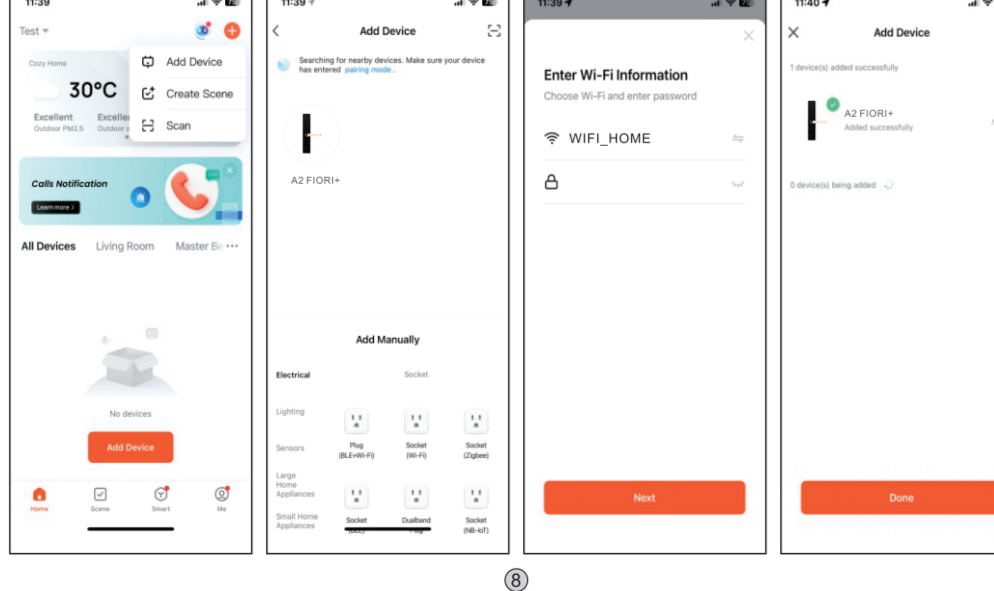

Mobile APP Download

Download "A2 SMART LIVING" from APP Store or Google market, open the APP and register the user via Email or Mobile number.

APP Adding

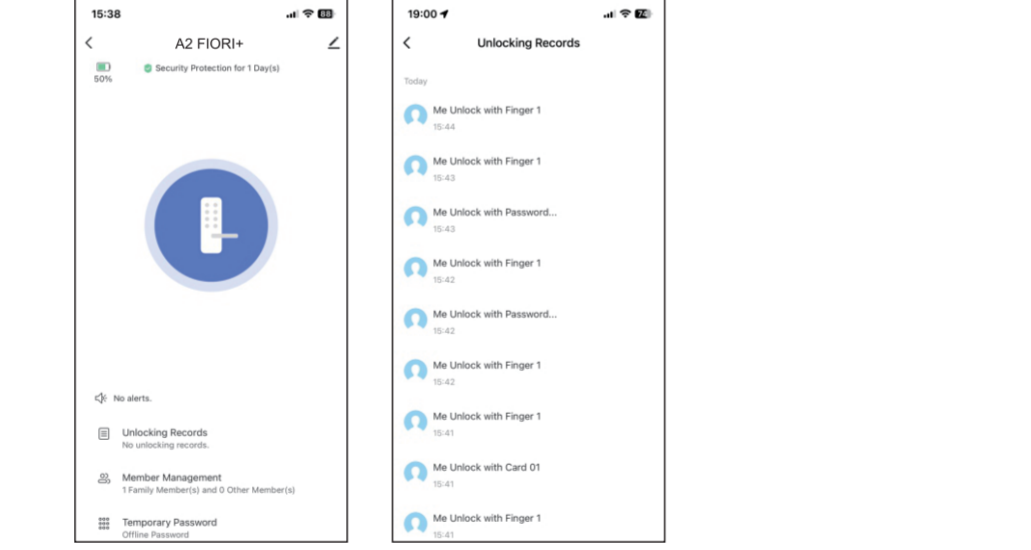

Note:
a. The APP would search available smart lock devices automatically.
b. During adding, please make sure your phone and lock are with same Internet.

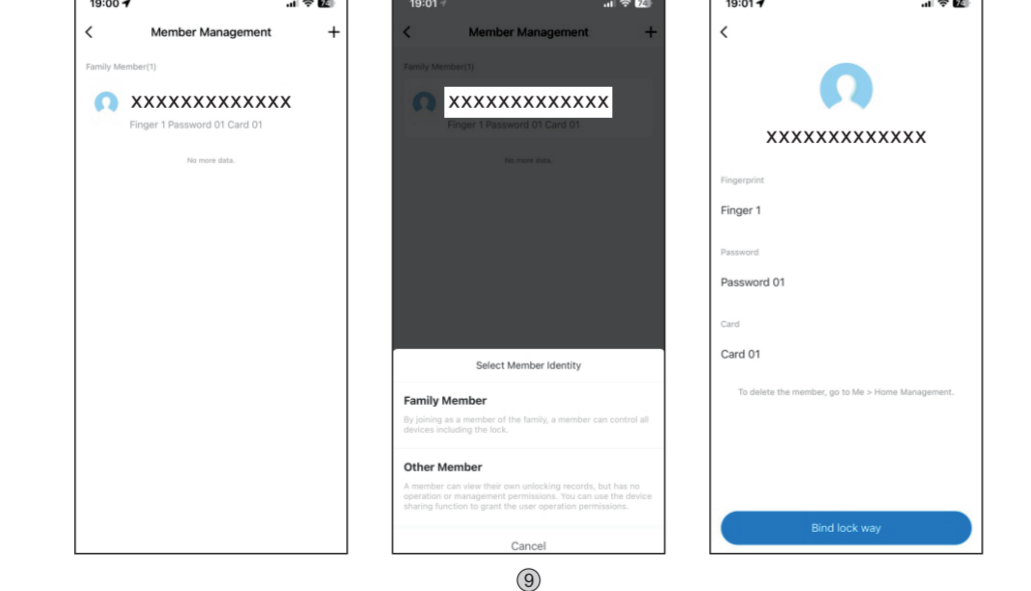

APP Operation

Access Records
After unlocking with fingerprint/password / card, you can sort them to different users and rename them via "Member Management" menu.

Member Management

Add new users and authorize them as common user or admin users. Meanwhile, you can manage them Note: For App admin users, they are with same permissions to manage the locks.

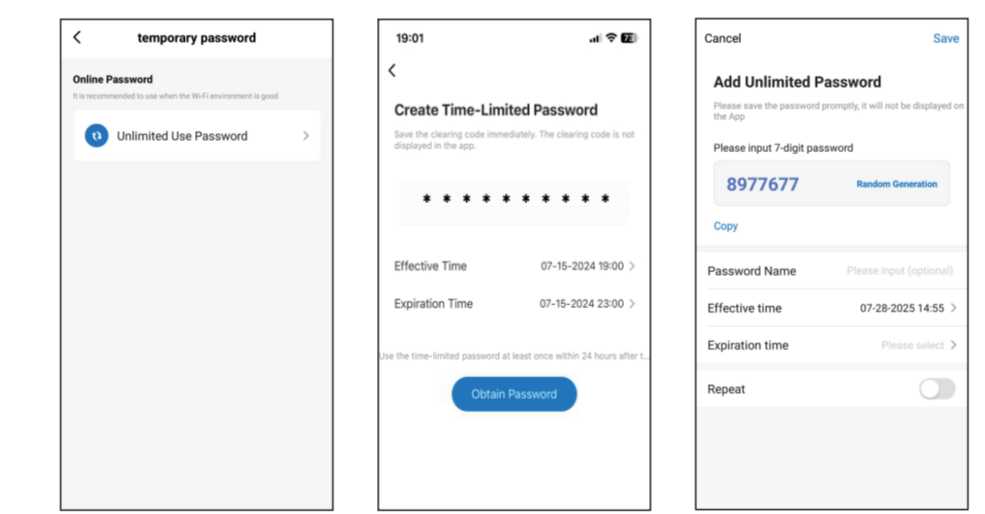

Remote Unlocking

When someone press the doorbell, you would get one doorbell notification and authorize to unlock remotely.

Temporary Password

Note: i. The lock time would be synced with the phone once the lock is added to the APP
ii. You need to wake up the lock via doorbell or others to make lock connect to the internet, or not the password do not work .

Other Functions

Password Protection Function

Enter the wrong fingerprint/password/card five times in 5 minutes, and the system will go into sleep mode for 95 seconds.

Random Password Function

Add any numbers before or behind the real password to prevent other person to peep the real password.

Low Voltage Alarm

When the voltage of installed batteries is lower than 4.8v, there will be a sound alarm after each opening, please replace batteries in time.

Anti-Pry Alarm

If someone pry the front panel to break in, the lock would make alarming and send notification to your APP.

Emergency Power Supply

When your battery is dead, charge the lock via one 5V Type-C power bank.

Mechanical Key

If the electronic function not work, unlock the door via the mechanical key.

Locking & Unlocking

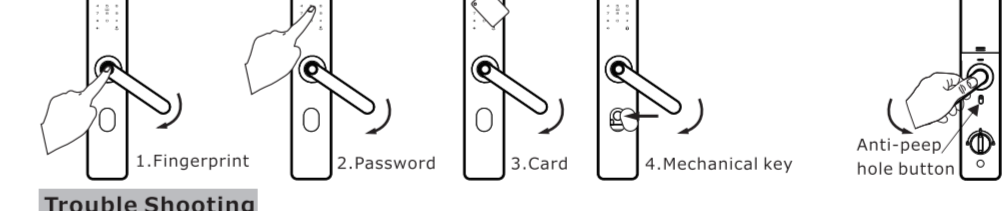

Locking Operation

Outside: Close the door and lift up the handle to extend the deadbolt.
Inside: Close the door, lift up the handle to extend the deadbolt and rotate thumb turn to extend security bolt.

Unlocking Operation

1. Fingerprint: put finger onto fingerprint reader, after verification and push down the handle to open the door.
2. Password: enter the 6-digit password and then tap #, after verification and push down the handle to open the door.
3. Card: put the card on card reader area, after verification and push down the handle to open the door.
4. Mechanical Key: insert and turn the key at the bottom, and then push down the handle to open the door.
5. Mobile APP: When someone press the doorbell to connect the lock to internet, you can authorize to unlock the door remotely.

Note: If the door is locked inside, all fingerprint / password / card / keys / app can not unlock the door
